¹Basket lifts automatically lift baskets from oil when the timer has stopped. This allows operators to produce consistent product each time and minimizes waste due to user error.

²Oil reclamation systems allow restaurant operators to remove used oil easily and safely from their kitchens. Old cooking oil is transferred to a collection tank and then taken off site by a third-party company for refinement into clean biofuels.

FACTORY-INSTALLED OPTIONS | VHG SERIES

Option Code Description

OR Patented rear oil reclamation hook-up with lockable gate valve

Oil reclamation systems allow restaurant operators to remove used oil easily and safely from their kitchens. Old cooking oil is transferred to a collection tank and then taken off site by a third-party company for refinement into clean biofuels.

KLEENSCREEN PLUS® FILTRATION

STANDARD FEATURES:

- Patented filtration system extends oil life
- Additional crumb screen basket, acting as a pre-screen to catch particulates, easing cleaning and improving speed of filtration 200-400%
- High-temperature discard hose
- Lightweight (less than 12 lbs.) stainless steel pan construction — easy cleaning and dishwasher safe
- Operates with most oil reclamation systems
- Hands-free oil return line is self-seating when drawer is closed
- Easy-to-use filter controls
- Oil drain valve interlock switch with (A), (D) and (C) controls for each tank
- Larger drain pan for 2-, 3- and 4-battery fryers with 50-lb vats

The KleenScreen PLUS® filtration system comes with a stainless steel mesh, but also has a fabric filter option:

NOTE: Please contact Vulcan Customer Service for additional options required when using solid shortening.

Included: Stainless Steel mesh

Filters down to 60 microns (size of grain of salt).
Compatible with third-party paper filters

¹Recovery refers to the length of time it takes for the oil temperature to rise back to set temperature after frozen or cold food has been dropped in.

²Boil-Out is a popular method used to clean a commercial fryer by boiling water and cleaning solution in an empty frypot.

³Basket lifts automatically lift baskets from oil when the timer has stopped. This allows operators to produce consistent product each time and minimizes waste due to user error.
