

Raising The Curtains

On An Important Dishwasher Feature

Dishwasher curtains affect dish cleanliness and, therefore, consumer health. Did you know they also affect worker comfort, safety and utility bills?

It's easy to forget about them and their importance.

Let's raise the curtains on what to know about...curtains!

Utility Savings

Hobart curtains are custom-designed for a precise fit. This prevents water and heat leaks. Replace them when recommended and your water and electric bills will pay you back.

Sanitization

Hobart's heavy duty, multi-layer design is key to achieving critical temperature for proper sanitization to meet local public health requirements.

The Signs

Fresh curtains are due when these signs occur:

- > Curling
- > Stiffness
- > Splits and breaks
- > Escaping spray and steam
- > Residue, mildew, mold build-up
- > Ponding water on the floor
- > Muggy kitchen air

Frequency

Hobart recommends replacing curtains every 6 months in full-time kitchens. If part-time, then every 7 to 12 months. On average, the dishwasher has four curtains, approximately **\$400 in savings**
